

# Health Law Volunteer Needed

We are looking for a health law attorney who might be willing to speak via video, for 30 minutes, to a group of Integrative Behavioral Health Clinicians about the NH laws regarding minors. These clinician's practice primarily with Medicaid patients in primary care practices.

The types of questions we are looking for guidance/guidelines include

- Can a minor seek counseling with consent of parents? What ages?
- What about if they access their parents' insurance for payment?
- Are there laws about providing birth control?
- Do we need to tell parents if their child talks about suicidal thoughts (not actively suicidal)?
- What if the minor discloses that they are doing self-harm (non-suicidal)?
- What about if the minor is vaping, drinking or using marijuana?

We would be grateful for any assistance you can provide.
